

Hydraulic Power Pack Diesel Driven LPP 14 L/11cc/w - 213492

The Hydraulic Power Pack LPP 14 is used as a power source for skimmers and other smaller hydraulically operated equipment such as boom reels, air blowers etc. The power pack is a lightweight, easily portable power solution for hydraulic equipment that can be operated in remote locations. The main components of the LPP 14 are: air-cooled diesel engine, hydraulic pump, hydraulic power outlet connectors, hydraulic oil tank with hydraulic return filter, fuel tank, operation valve, battery, and frame.

For easy operation, an electric start is standard with a manual start as back up. The LPP 14 is equipped with two hydraulic circuits and a 14 kW (18.7 hp), air-cooled single cylinder diesel engine mounted in a mobile frame with wheels manufactured in tough tubular steel.

The LPP 14 is supplied with high quality TEMA connectors as standard:
 Valve 1: 3/8" TEMA 3811/3821, 10 l/min (2.6 gpm)
 Valve 2: 1/2" TEMA 5011/5021, 35 l/min (9.3 gpm)

TECHNICAL SPECIFICATIONS

Length	1200 mm	47 in
Width	860 mm	34 in
Height	830 mm	33 in
Weight	195 kg	430 lbs
Hydraulic flow	45 l/min	12 gpm
Hydraulic pressure	180 bar	2610 psi
Power	14 kW	18.7 hp

BENEFITS

- Light weight and portable, with wheels
- Multipurpose power source
- Electric start as standard
- Manual back-up start
- TEMA connectors as standard
- Air-cooled single cylinder diesel engine
- Robust steel frame
